

AIR TAHITI SELECTS WIREMIND AS TECHNOLOGY PARTNER

News / Airlines

Air Tahiti has selected Wiremind as a new technology partner, and will implement its PASSENGER suite of solutions, marking the start of a collaboration focused on strengthening the airline's commercial capabilities. Through this partnership, Air Tahiti will benefit from Wiremind's data analysis expertise in passenger transport. The collaboration reflects Air Tahiti's commitment to equipping its teams with modern tools that enhance visibility, support informed decision-making, and contribute to overall operational and commercial performance.

Vairani Tetaria, Air Tahiti Marketing and Commercial Director commented: "Partnering with Wiremind represents an important step in our ongoing digital evolution. As we continue to modernize our systems and processes, it is essential that we work with technology partners who understand the specific challenges of passenger transport. Wiremind's expertise and innovative approach will help support our teams with the tools and insights they need to operate efficiently and effectively."

Philippe Renon, CRO of Wiremind stated: “We are delighted to welcome Air Tahiti as a partner. Air Tahiti has been at the core of connecting Tahiti and the islands for over 65 years now, and we are proud to support their teams with advanced technology tailored to their needs. This collaboration reflects our shared commitment to operational excellence and continuous improvement.”

Wiremind supports airlines and passenger transport operators worldwide with intelligent solutions designed to improve efficiency and strengthen performance in complex and dynamic environments. Leading clients include Transavia, Flair Airlines, SNCF, BlaBlaCar, and many others.

This partnership further reinforces Wiremind's continued growth in the passenger transportation market and its commitment to supporting airlines with advanced, scalable solutions.
