DC AVIATION AL-FUTTAIM EXPANDS MAINTENANCE CAPABILITIES

News / Business aviation

DC Aviation Al-Futtaim has expanded its maintenance capabilities with the addition of two new aircraft types.

The Al-Futtaim group company, which has been granted approval from the UAE General Civil Aviation Authority (GCAA) and European Aviation Safety Agency (EASA), can now provide maintenance at its hangar at Dubai World Central for the Bombardier Global 6000 and Global 5000 Vision Flight Deck aircraft types.

“We are extremely pleased to add the Global 6000 and Global 5000 Vision Flight Deck aircraft to our maintenance capabilities,” said Michael Lindgren, director maintenance at DC Aviation Al-Futtaim. “This expansion is due to increased customer demand and is in line with our plan to provide greater service offerings to our customers. The approvals from the UAE GCAA and EASA further reiterate our commitment to meeting the highest quality standards to ensure that our customers and their assets are safe and secure.”
