Torsten has over 16 years of maintenance experience in both private jet operator and international airlines, he holds EASA, HKCAD and FAA licenses on Gulfstream, Boeing and Airbus types. Kelly is also an FAA license holder with an additional FCC license, specialising in Gulfstream avionics for 14 years out of his total 20 years of engineering experience.

“We are very glad to work and share our airframe and avionics knowledge with the excellent team here at Metrojet Engineering Clark and we look forward to further bolstering the MRO business with our expertise and the facility standards in the Asia Pacific region” said Mr. Torsten Moeller, the Lead Airframe Engineer and Mr. Kelly Chiasson, the Lead Avionics Engineer.

Metrojet Engineering Clark has recently continued its expansion plans with the increase of the Bombardier Challenger capability to 96 month inspections and the addition of Gulfstream G650 type rating. In addition, the wheel and tyre component capabilities have been expanded across Gulfstream, Bombardier and Embraer products.

Chief Operating Officer of Metrojet – Mr. Bruce Watson commented, “We are delighted to share with the market our continuous improvement and development activities in support of our MRO facility in the Philippines. Torsten and Kelly add additional skills and experience as part of our overall development strategy along with supporting the increase in maintenance capability for the local and Regional market.

Established in 1995 and awarded Air Operator's Certificate in 1997, Metrojet is a leading business jet operator and maintenance provider in Asia. The Company provides comprehensive aircraft management, charter, maintenance and consultancy services, and pioneered business aviation services for 20 years in Hong Kong.
