TURKISH AEROSPACE AND AIRBUS SIGN COOPERATION AND RESEARCH AGREEMENT DEVELOP NOVEL AIRCRAFT STRUCTURES

News / Events / Festivals, Manufacturer

Turkish Aerospace Industries and Airbus have signed a collaborative agreement on research and development in secondary structures, such as movable parts,for Airbus aircraft programs. The agreement was signed by Turkish Aerospace President/CEO Prof. Dr. Temel Kotil and Airbus Head of Europe, Caucasus and Central Asia Strategy and International Dr. Marco Miklis in a ceremony at the Istanbul Airshow 2018.

Underlining that the agreement is important in expanding and developing the technology and innovation research partnership between Airbus and Turkish Aerospace Industry, the President and CEO of the Turkish Aerospace Industry Prof. Dr. Temel Kotil said: "Between our technological partnerships in Turkey, we provide a new and significant contribution. The agreement we have made with Airbus, one of the world's leading companies, for future commercial aircraft technologies shows that our company is progressively advancing in its technological leaps."
