

GARMIN® EXPANDS COST-EFFECTIVE NAVIGATION DATABASES TO INCLUDE SOUTH AMERICA

News / Business aviation

Garmin International Inc. announced the addition of new, cost-effective Garmin Navigation Database information for South America. This database will soon be available in the newly expanded Americas OnePak, which offers coverage in North, Central and South America and provides database updates across all Garmin avionics and a portable in a single aircraft.

“Given the tremendous success of the Garmin Navigation Database, we’re excited to expand coverage even further to South America,” said Carl Wolf, vice president of aviation marketing and sales. “This expanded coverage offers pilots a cost-effective alternative that can be packaged with other databases to provide pilots with all of the information they need in a single aircraft for an entire year – at one low price.”

South American navigation data

New to South America, the Garmin Navigation Database provides a trusted and convenient path to incorporate the latest database information within select Garmin avionics. Data such as instrument procedures, frequencies and airport data are included in this database. Coverage of the new Garmin Navigation Database in South America starts at \$149 USD for a single update and \$399 USD for an annual subscription for the GTN™ 650/750 touchscreen series or GNS™ 430W/530W navigators.

OnePak annual database updates

Pilots operating across the Americas are offered significant savings with OnePak annual database subscriptions, which combines the Garmin Navigation Database and many other Garmin databases (where available) to provide additional data options that suit their needs. For one annual price, databases within OnePak subscriptions can be downloaded to multiple Garmin avionics and one qualifying portable in a single aircraft. The Americas OnePak that incorporates the new South America data is available on compatible products for \$724 USD, which includes the Garmin Navigation Database, Terrain and Basemap and can also include the Airport Directory, IFR enroute charts, VFR sectional charts, Obstacles and SafeTaxi®. The purchase of a OnePak subscription also provides existing Garmin Pilot™ subscribers with an upgrade to Garmin Pilot IFR Premium that includes coverage in South America.

The Garmin Navigation Database and OnePaks are compatible with the following certified avionics:

- GTN 650/750 touchscreen navigators
- GNS 430W/530W navigators
- G500 TXi™/G600 TXi/G700 TXi/G500H TXi flight displays
- G500/G600/G500H flight displays
- G1000®, G1000 NXi, G2000®, G3000®, G5000®, G1000H® and G5000H Integrated Flight Decks¹

Compatibility is also available for the following experimental flight displays and portables:

- G3X™, G3X Touch™ and G900X® glass flight displays
- aera® 660
- aera 795/796 series
- aera 500 series
- GPSMAP® 696

The new Garmin Navigation Database with South American coverage is expected to be available by October. To purchase and download the new Garmin Navigation Database or OnePak database subscriptions and to view additional database pricing or coverage information, visit: www.flyGarmin.com.
