NEARLY 40% OF PRIVATE JET FLIGHTS NOW FUELED BY CRYPTO PAYMENTS - JETFINDER AT THE CHARGE

News / Business aviation

JetFinder has recently set a remarkable milestone by recording the largest cryptocurrency transaction in its history, an impressive sum of approximately 750K USDT for a single flight booking. This significant achievement underscores JetFinder's position in the private aviation market and the growing acceptance and use of digital currencies in the luxury travel sector.

Bitcoin ETF potential approval may change the crypto industry?

The anticipated approval of a Bitcoin ETF represents a significant milestone in the financial and aviation sectors, potentially revolutionizing the private aviation industry. If approved, it could legitimize cryptocurrency as a mainstream investment option, increasing its stability and acceptance. For the private aviation industry, this could mean a broader adoption of cryptocurrency for transactions. Overall, the approval of a Bitcoin ETF could be a catalyst for substantial change, driving innovation and modernization in private aviation payment and booking systems.

Fly on your own terms: on-demand charter flights with crypto payments

Embrace the ultimate freedom of flying on your own schedule with JetFinder's on-demand charter flights.
