

YINGLING AVIATION COMPLETES FIRST 192 MONTH INSPECTION ON GULFSTREAM G550

News / Business aviation, Maintenance / Trainings

Yingling Aviation announced successful completion of its first 192 month inspection on a Gulfstream G550, marking a significant milestone and the largest project completed by the company to date. The extensive heavy maintenance inspection was executed successfully and followed by a comprehensive refurbishment. The scope of work included full soft goods replacement, veneer refurbishment, and avionics upgrades, delivering a fully modernized aircraft experience for the customer.

Vinnie Venditto, Executive Vice President and General Manager commented: "This project demanded an exceptional level of communication, teamwork, and technical expertise. Our team truly came together and demonstrated the depth of talent and experience we have at Yingling. Completing a project of this scale represents a major achievement for our organization."

The project required close coordination and collaboration across multiple teams and stakeholders. From the broker and Director of Maintenance to the aircraft principal, all parties involved expressed high satisfaction with the outcome.

The successful completion of this 192 month inspection further strengthens Yingling Aviation's growing capabilities in large cabin aircraft maintenance and interior refurbishment, reinforcing its commitment to delivering high quality results through collaboration, craftsmanship, and customer-focused service.
