

AAG FLIGHT ACADEMY SELECTS ALSIM AND BUYS AN AL250 FLIGHT SIMULATOR

News / Maintenance / Trainings

AAG Flight Academy, based at Ganderkesee Airfield in Germany, has selected an ALSIM AL250 for its training needs. The AL250 simulator addresses initial phase training needs (PPL, CPL, IR/ME) and is SEP/MEP re-configurable simulator certified as an EASA FNPT II. In addition, it offers both classic and glass cockpit for each flight model at the simple flick of a switch. This device has been extremely well received since its creation and more than 100 of these have already been installed and are in successful operation worldwide.

Dörthe Dreher, Marketing Manager of AAG Flight Academy, said: "The rapid development of student numbers in recent years encourages us to take the next step now and expand our range of services by offering professional pilot training in the future as well. We are convinced that our new FNPTII will support us significantly in our future plans and chose the ALSIM AL250 FNPTII, because this generic device with six different aircraft models best suits our needs."

Alexander Schaffler, CEO FTD Consulting & Flight Simulator Trader, who supported the transaction, stated: "We have been recommending ALSIM products for several years now, not only because of the nature of the product itself, but also because of the outstanding team effort and professionalism, which at this fidelity level of FSTDs is unique in this industry."

Audrey Jeffroy, ALSIM's Sales Director, commented: "We are very proud to welcome AAG Flight Academy among our customers. Adding an AL250 flight simulator will enable the flight academy to provide high-quality courses and answer their PPL, CPL and IR training needs. We are very pleased to begin a successful cooperation between our two companies."

Atlas Airfield GmbH is the operator of Ganderkesee Airfield. This perfect location in northern Germany is also home to the well-established company's flight school AAG Flight Academy. Currently, more than 100 students complete their training with us on six aircraft of different types. We offer flight training for private pilots and for instrument flying as well as instructor trainings. Our excellent mixture of more than 20 flight instructors with professional flying backgrounds and solid training experience ensures a professional delivery of theoretical and practical training.
