

ALL IN AVIATION PURCHASES THE ALSIM SR FTD

News / Maintenance / Trainings

The sale of ALSIM ALSR FTD was concluded on display at EAA AirVenture Oshkosh 2022. All In Aviation became the first independent flight school in America to acquire an ALSIM SR FTD.

The ALSIM ALSR FTD has the latest Cirrus SR G6 specific interior cockpit and flight deck including a real Garmin GDU 1050A and GFC 700 Autopilot. It is further equipped with a Garmin® GMA 350C® – All digital Audio Panel and a Garmin® GCU 479®. It can also simulate the Cirrus Airframe Parachute System® (CAPS®). The ALSR FTD or Flight Training Device (FTD) is compliant with the latest aviation standards from EASA and the FAA (FTD Level 5) to Transport Canada and the CAAC.

Paul Sallach, President of All In Aviation, commented: “We first met the ALSIM team in 2021 and were immediately impressed by their staff and their products. After watching their relationship with Cirrus Aircraft grow, combined with the undeniable realism of the FTD, the choice was a no brainer. We plan on incorporating the simulator in all aspects of our business and training.”

Dr Scott Firsing of ALSIM's North America office adds: “We at ALSIM are thrilled to be working with All In Aviation and more members of the Cirrus Aircraft family. We know, based on past experiences of our clients, that their simulator will be an integral part of their operation. We look forward to seeing this relationship evolve, and we will very much enjoy seeing Paul and the All In team every time we are in Las Vegas.”

All In's SR FTD will be installed at their Henderson Executive Airport location towards the end of this Summer.
