

CREATION OF AN AVIATION MAINTENANCE TRAINING CENTRE OF EXCELLENCE IN UAE

News / Events / Festivals, Maintenance / Trainings

Abu Dhabi Aviation Training Centre and Resource Group signed a Memorandum of Understanding with the purpose of working together to create an Aviation Maintenance Training Centre of Excellence, to serve the UAE and wider regional market. The UAE's aviation sector includes some of the world's leading aviation companies and continues to be an important contributor to the UAE's on-going and future sustainable development. Sustainability requires the addressing of critical skills shortages that may be created by significant growth, thereby reducing the dependency on imported skills and through the development of home grown skills. Aside from the UAE's domestic market the UAE's role as a major worldwide transport hub makes it an ideal geographic location for students to study and attain globally recognised aviation maintenance qualifications.

Bringing together the potent capabilities of both organisations, the proposed collaboration will leverage Abu Dhabi Aviation's (ADATC's parent company) outstanding reputation in Operations and Maintenance Repair and Overhaul (MRO) as well as its extensive local and international client base. Resource Group, through its Aviation Technical Training business, brings EASA and GCAA training approvals, 15 years of flawless, worldwide training delivery and an enviable reputation for civil and military, fixed and rotary wing maintenance training. To be housed in ADATC, the AMTCoE would be co-located with ADATC'S existing flight crew training offering and state of the art full motion simulators.

Ian Fitzpatrick, Resource Group's Managing Director for Training Solutions commented: 'This MoU is the result of 18 months of business planning and due diligence and represents a firm first step toward the ultimate objective of establishing the AMTCoE in the UAE. For Resource Group it represents a key strategic expansion of our outstanding training offering and we are delighted be alongside such a reputable partner in Abu Dhabi. The ultimate aim will be of course to train for Abu Dhabi Aviation and other large organisations but also to potentially offer individuals a route into our fantastic industry that doesn't otherwise exist currently.'

Resource Group's CEO Stephan Hickma said: 'The signing of this MoU is an important development in Resource Group's ambition to continue the expansion of its global aviation training footprint. We are especially pleased to be taking this step with Abu Dhabi Aviation, one of the longest established and most respected aviation businesses in the Middle East that has a truly global reach'.

Ahmed Al Khouri, Managing Director of ADATC: 'ADATC is pleased to announce its partnership with Resource Group, a UK leading part-147 approved training organisation, in order to provide first class technical training in Abu Dhabi. Resource Group has over 15 years of industry embedded experience of a wide range of training services. ADATC and Resource Group will cooperate and combine their strengths to form a formidable training organisation in the region. The Training organisation will operate from ADATC's state of the art training centre in Abu Dhabi and will be a regional training hub covering the Middle East, Africa and Asia Pacific Region. The training organisation will provide practical hands-on technical training of basic and fundamentals'.
