AIRBUS PROPOSES MEDEVAC CONVERSION OF PASSENGER AIRCRAFT

News / Manufacturer

A multi-functional team composed of Airbus Commercial Aircraft, Airbus Defence and Space and Airbus Helicopters has proposed a solution to quickly convert passenger aircraft into a Medical-Evacuation (“MEDEVAC”) configuration to offer to customers worldwide. The French DGS (Direction Générale de la Santé) has actively supported Airbus by providing all the medical specifications associated with Covid-19 patients in intensive care and low care. In six weeks, the team defined solutions based on A330/A340 platform which is capable of carrying COVID-19 patients in intensive care over a long-range distance. The concept has been subsequently fine-tuned and Airbus is now in a position to offer a mature solution to any customers wishing to perform MEDEVAC operations.
