

PIPER PILOT 100I TRAINER AIRCRAFT - FAA TYPE CERTIFICATION AND FIRST DELIVERY

News / Business aviation, Maintenance / Trainings, Manufacturer

Congratulations! Piper Pilot 100i trainer aircraft has received type certification from the Federal Aviation Administration! The Pilot 100, which was announced during Sun-n-Fun in 2019, is the value priced addition to Piper's trainer-class line. Following certification, Piper began deliveries to its launch customer, American Flyers, who will be taking delivery of eight Pilot 100i aircraft by the end of 2020.

AMERICAN FLYERS

"We are excited to add the Pilot 100 series to our training product line at a price point that provides optimal economics for all operators", said Piper President and CEO, Simon Caldecott. "During these uncertain times, our team has continued to remain focused and

has worked diligently to bring to market an aggressively priced, proven trainer that offers the advanced systems and performance that flight schools and airline programs of all sizes desire.”

The new Piper Pilot 100 rounds off Piper’s portfolio of training aircraft products. With five model series (Pilot 100i, Archer TX, Archer DX, Arrow, and Seminole) the company offers the widest range of training products of any aircraft manufacturer, and meets all the individual needs of its training operators and customers. For 2021, flight schools now have an option for a factory new, robust trainer that is priced under \$300,000 and is IFR equipped with digital autopilot.

“The Piper Pilot 100i is the perfect mix of simplicity and technology. The G3X avionics suite is the only glass platform that allows for toggling between round dial and tape displays in a touchscreen format. This outperformed the G1000 suite on so many levels and was the primary reason we selected the Pilot 100i,” said American Flyers’ National Chief Pilot, Steven Daun.
